OCCASION CAUSE OF MUCH CIV-IC TROUBLE.

# Thirty-two In Jail and Two Quards

Pay day at Camp Ferris Friday las was the occasion of many wild orgies among the guards which caused the jail to be filled and two of their num-

ber to be stabbed. Early in the morning the pay master's car, heavily guarded, left the Grayling bank with \$77,000 in cash to be distributed among the soldiers at Camp Ferris and with clock-like system this large amount was transferred from the car to the men.

It seems that this was made a holiday and many passes were issued and soon the town was filled with soldiers and many began to use their salaries the afternoon much singing could be heard in some of Grayling's saloons where those of the men who so desired were quenching their pent-up spirits in social drink. Worm's Work Seems Almost to Prove It is Equipped With Something Like Intelligence.

The question of where intelligence egins to manifest itself in the scale f animal life has often been asked seems to exist even in the lowest forms. A peculiar specimen of the inverterbrates of the ocean, an exceedingly small worm-so small that it ensifres less than four millimeters in length-exhibits movements that canbe explained by anything but intelligent will.

This midget senworm is a constructor: he builds a rampart in the shape of a tube, composed of grains of sand. His form shows a hanging double lip jutting like a fleshy precipice over a great mouth, four black eyes set in the front of his head and two tentacles which work incessantly, wringing and ashing whatever they can reach. It is with the same apparently nervous tentacles that the little monster of the deep seizes his material, the glistening sand, of which he constructs his rampart.

He catches a grain of sand in his tentucles and immediately carries it to his mouth. In his mouth nature secretes a strong cement. after another is covered with cement and rapidly accumulated in the form of a tube. Naturally enough, when the builder works so fast, there must be breaches in the walls. These breaches are carefully scrutinized by the worm, filled with grains of sand and covered with cement. When fin-ished, the tube is a very practical and

Western Inventor Devises an Aerial Torpedo That Gives Promise of Effectiveness:

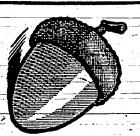

What may eventually prove to be a highly effective war implement, and if so, possibly render present heavy artillery obsolete for long-range operations, is a self-controlled aerial tornedo that has lately been developed in Colordo. It is described in the August number-of-Popular Mechanics Magazine. In a general way, the instrument attempts to accomplish over and what the United States navy's new wireless torpedo does at sea. Its principle and method of operation, of course, are entirely different. As is to be inferred; it consists of a small nireraft-much like an ordinary biplane—carrying a large, high-explosive torpedo which it is designed to drop at any predetermined spot within a eertain radius. The projectile, which -is-about twelve feet in length, forms into two compartments. ORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by puregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotics" is: "A medicine which relieves pain and produces sleep, but which in poisons ous doses produces stuper, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. will bring a package of breakfast flakes with a delicious new corn flavour - flakes that don't mush down when milk or cream is added, nor are they "chafty" in the package like the ordinary kind.

These New Post Toasties are manufactured by a new process using quick, intense heat which raises tiny bubbles over each flake, the distinguishing characteristic. And the new process also brings out a new corn flavour, never tasted in corn flakes of the past.

Try a handful dry—they're good this way and the test will reveal their superior flavour. But they're usually served with milk or cream.

vards. They ride from real nomes to their offices and from their offices to their offices and from their offices to their homes, with an occasional trip through the parks and over the routes where the crowds are to be found on Sundays.

Consequently, they soon grow weary of what they call "the hame old thing." They have yet to fearn that touring in an automobile is not surpassed by any other kind of outdoor fun., They have failed to put their cars to one of the best of their many splendid uses. In these days of road-improvement, and since automobiles in general have been developed to a point at which the troubles that used to be common have practically been eliminated, it is possible for the tourist to start for almost any point with a reasonable certainty of getting there and back.

The betterment of roads in almost all parts of the country has been accompanied by the establishment of many conveniences which add to the pleasures of motoring. One never gets far from a place at which gasoline is supplied; there can be found at nearly any country store, and a shop at which emergency repairs can be made is usually close at hand if things happen to go wrong.

ally close at hand it things happen to
go wrong.

Furthermore, there has, owing to the
popularity of touring, been an appreciable improvement in the accommodations offered by hotels in the small
towns and villages. Good meals and
comfortable beds at reasonable prices
are the rule, rather than the exception,
almost wherever the tourist finds it
necessary to put up for the night.

The country tavern has been reindslitated. To the liveliness and pretenslons of the old stage coaching days
have in many instances been added
modern conveniences and up-to-date
service which contributes much to the
enjoyment of the touring party.

It is hardly too much to say, indeed, that there isn't a single section of any state that is altogether lacking in places of unusual scenic charms or historical or romantic associations.

Later the sheriff arrested Schmidt, who was ordered to appear for arraignment at 9:00 a. m. yesterday. At this time, by, his counsel, Geo. Mahon, Schmidt stood mute and pleaded "former conviction." The -case came-to trial-yesterday afternoon at 3:00 o'clock. After a lot of difficulty in the drawing of jury and the hearing of the testimony on the side of the People, motion was made that the proceedings be quashed on holding that person cannot be held in jeopardy more than once for the same offense. The prosecuting attorney cited statutes showing that a voluntary surrender cannot be held without the knowledge and consent of the party injured, and also that a war rant issued without being authorized by the prosecuting attorney, cannot be considered legal. Judge Palmer denied the motion of the defense. The defense submitted no testimony, evidently basing their defense entirely upon the merits of "former convic-tion." Mr. Schmidt has given verbal notice of appeal to the circuit court.

# GLASS OF SALTS IF YOUR KIDNEYS HURT

have Bladder trouble—Salts fine for Kidneys.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dissiness, your stomach sours, tongue is conted and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acide and flush off the body's urinous waste get about four ounces of Jad Saltsfrom any pharmacy; take a tablespoonful in a glass of water before break-fast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salts is made from the sold of grapes and lemon juice, com-bined with lithin, and has been used for generations to clean and stimulate sluggish kidneys and stop bladder irritation.
Jad Salts is inexpensive; harmless and
makes a delightful efferescent lithiswater drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases.

Allies Get Together. Their defeats finally taught the allies that their efforts must be co-ordinated, like their enemies', if they were to be effective. A new war council, with all the allies represented. met in Paris December 7 and a kind of international general staff was organized. It is known that General Joph' Joffre, French commander in chief since the beginning of the war. and the hero of the battle of the Marne, was the presiding genius. The effects of the council were not to be seen for several months, but now they

are being realized in full measure.

To check a simultaneous allied of fensive, which they clearly saw com ing, the Teutons decided on two at tacks of their own. This follows the vell-known axiom of German military strategy that the best defense is an energetic attack.

The first of these offensive defen-sives was the attack on the French fortress of Verdun, where the work were subjected to a whirlwind of fire beginning February 21.—The gains of the first week were great, and German critics foretold the collapse of the Zeppelins in a raid on London October Two of the defending forts, 13. Voux and Douaumont, fell, and important positions were taken west of the Meuse river as well

But Joffre rallied his men in spienground at an awful cost in German blood. Step by step the crown prince's men pushed forward, but today they are still more than two miles from the ruined fortress town and the resistance of the French is as strong a ever.

Russia's Big Push.

Millions of shells, manufactured argely in British, Japanese and American factories, blasted away-wire trenches, dugonts and observation points. Then the hordes of Siberians, Cossacks and others swept over the field. The Austrians could withstand the impact and they gave way stendily.

June 6, General Brusfloff announced the capture of 13,000 Austrians; June number for the three su ing days alone was 43,000, and the numbers kept mounting until on July 20 General Shoovaleff, Russian tille var, estimated the num Austro-Hungarian prisoners at 270, 000. That the czar is anticipating further great gains of territory is seen from Russia's action in mobilizing the nales of the island of Sughalien. Turkestan, and one other district to build roads, dig trenches and do other work of organizing the ground won.

Allies' Drive in Somme Region. Almost a month to a day following the beginning of the great Russian-ofensive French and British opened their drive in the vicinity of the Somme river. They have gained grad-ually but stendily, and the official reassert the losses of the attack-

ers are comparatively small.

It is also the claim of the allies that
the France-British offensive can be ke, up at its present rate indefinite-ly, and will not have to be slackened for lack of shells, guns or men. The rate of progress is much greater than the Germans' at Verdun, but the country traversed is less difficult. On the other hand, the Verdun assailants have the advantage of attacking from the outside of a curve, while the inside the salient they have made in the line. Meanwhile the Verdun offen sive of the Germans continues.

# HAS MANY FRIENDS IN GRAYLING.

Sure of Receiving Large Vote Here at Primary Election

Miles M. Callaghan, of Reed City, is making a whirl-wind campaign thruout the district in the interest of his candidacy for State Senator. 28th district. He had a late start in the race but his home people are backing him up to the limit and besides he is so well known thruout the district that he is going to pull a strong vote in all sections.

ne is going to pun a strong vote in an sections.

In Grayling, Mr. Callaghan has a large acquaintance, especially in fraternal circles. He is known to practically every member or the Loyal Order of Moose and practically every one of them will back him up with their votes besides they are out hustling for him.

one of them will back him up with their votes besides they are out hustling for him.

Having closed the fall campaign in 1912 by delivering a political talk before a crowded opera house of Grayling people, he is well known to a large majority of Crawford county republicans, who remember well his enthusiastic republican spirit and recognize him as a man well informed and with the ability to back up his statements.

Mr. Callahan was for many years postmaster of Reed City and after retiring was a successful hardware merchant.

He has for many years identified himself with affairs of state, fighting for the great principles of fairness to both capital and abor ulike, and the adoption of constructive, material laws and regulations. He is alive to the

adoption of constructive, material laws and regulations. He is alive to the greater needs of the State and is a man of keen intelligence coupled with fair mindedness.

I am sure I stand, for all things that Crawford county and the 28th disrict need and I am egotistical enough to believe that I am able to serve the people better than any candidate, so far presented." Says Mr. Cellahan.

Mr. Callahan is also an extensive farmer making a big success of farm.

Officials of the League Lead an Army of 167,000 Voters. 121,000 of the Members Signed Petitions Seeking to Reduce the at Option Unit from County to Village, City and Township.

# EVERY OFFICER AND MEMBER IS AGAINST STATEWIDE PROHIBITION

Not one Officer or Leader of this vast army of Michigan Voters is allied with the Brewing Industry.

The league is officered by Business Men and Labor Leaders who sanction True Government Only. They are against Statewide Prohibition because it is confiscatory, because it would bring on high taxes, and because it would throw thousands of workmen out of

employment. Officers of the league also believe that the solution of the prohibition problem lies in the smaller unit.

They believe every city, village and township can best govern itself. They would make the village, the township and the city the unit of prohibition.

True community government would then prevail. Rights of citizens would be respected and rights of property holders would be upheld. Hysteria would have no place in the working out of Home Rule.
